

CS 2550: Principles of Database Systems (Spring 2017)
Department of Computer Science, University of Pittsburgh

Assignment #1: Sample Submission

Released: Friday, January 6, 2017

Due: 11:59pm, Friday, January 13, 2017

Goal

Gain familiarity with the web-based assignment submission interface and the class' honor code.

Description

The assignment is trivial and is meant to familiarize you with the web-based assignment submission interface, in order to avoid last-minute problems or cases where you thought you properly submitted your assignment when you did not.

You are simply asked to submit two files:

1. A copy of the handout about examples of permissible and prohibited collaboration that you can find under FAQ on our class web page. For more on the academic honesty, please see below and the policies on the class web page.
2. A plain text, a doc or a pdf file with the following pledge:

”Data Scientists/Database Engineer Commitment

I read the class handout about examples of permissible and prohibited collaboration and on my honor as a database student in CS2550 in the Spring 2017 term, I will neither give nor receive aid on my assignments and exams.

⟨sign your name⟩ ⟨date⟩”

Academic Honesty

The work in this assignment is to be done *independently*. Discussions with other students on the assignment should be limited to understanding the statement of the problem. Cheating in any way, including giving your work to someone else will result in an F for the course and a report to the appropriate University authority.

How to submit your assignment

We will use a Web-based assignment submission interface. To submit your assignment:

- If you have more than five files to submit, prepare your assignment for uploading by generating a single zip file with all the files.
- Go to the class web page <http://db.cs.pitt.edu/courses/cs2550/current.term> and click the Submit button.
- Use your pittID/username as the username and your PeopleSoft ID as the password for authentication. There is a reminder service via email if you forgot your PeopleSoft ID.
- Upload your assignment file to the appropriate assignment (from the drop-down list).
- Check (through the web interface) to verify what is the file size that has been uploaded and make sure it has been submitted in full. **It is your responsibility to make sure the assignment was properly submitted.**

You must submit your assignment before the due date (11:59pm Friday, January 13, 2017). There are no late submissions.
